

NEW INFORMATION SHEETS!

SASRI has just updated five information sheets to assist you with getting the best out of your sugarcane farm. Information sheets serve as quick reference sources as well as guidelines and advice on the management of the sugarcane crop.

Visit the SASRI website to access these useful products or consult with either your local Extension Specialist or the SASRI website (www.sasri.org.za/publications).

Ripening information sheets:

SASRI Senior Sugarcane Physiology, Dr Riekert van Heerden, has just updated four ripener-related sugarcane information sheets. These information sheets aim to assist a grower to accurately apply chemical ripeners to their farm in a safe and sustainable manner.

12.1 Principles underlying chemical ripening and late-season quality maintenance

12.3 Registered chemicals for ripening sugarcane: ETHEPHON

12.4 Registered chemicals for ripening sugarcane: FUSILADE FORTE

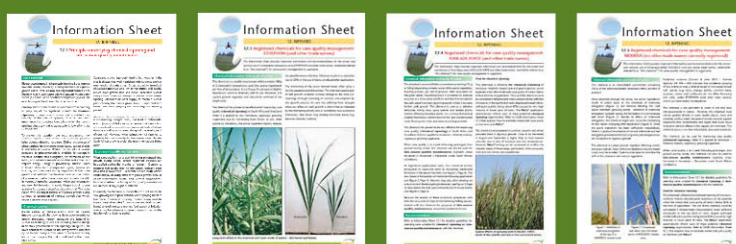

12.5 Registered chemicals for ripening sugarcane: MODDUS

Irrigation information sheet:

SASRI Senior Soil Scientist, Dr Louis Titshall, has produced a brand new irrigation information sheet to assist growers in the irrigated areas of the sugar industry. This sheet deals with the importance of irrigation water quality and includes information on water quality categories, water sampling procedures, water suitability for irrigation and properties of water quality as per the FAS water test report.
