TRACEY CAMPBELL
EXTENSION SPECIALIST

Attention North Coast Growers!

Are you aware of your local FAS service?

Here's what you need to know:

Weekly Sample Collection: Samples are collected every Wednesday. Ensure they are dropped off by 9am that morning.

Convenient Drop-off Locations: Choose between dropping samples off at the SASRI office (at The Workstation) or the green box located in far corner of The Workstation upper parking lot.

Types of Samples: We accept both soil and leaf samples, with a preference for fresh leaf samples dropped off as close to the collection day as possible.

Accompanying Forms: Samples must be accompanied with the relevant form. Forms can be downloaded from the FAS website - <https://www.fasagrilab.co.za/submissions/>

Expanded Services: Did you know that you can also submit samples for other crops. Fruit and nut crops (avocado, banana, citrus, grape, litchi, macadamia etc.), as well as grain crops (maize, wheat, barley etc.) pastures, vegetables, sugarcane, gardens, nurseries, golf courses and bowling greens.

Stay Updated: For any additional information or updates, visit www.fasagrilab.co.za
