

SENIOR CERTIFICATE COURSE IN SUGARCANE AGRICULTURE

5 FEBRUARY – 8 MARCH 2024: COURSE DETAILS AND APPLICATION FORM

This five week course in sugarcane agriculture is held at the Kwa-Shukela building of the South African Sugar Association (SASA) offices in Mount Edgecombe. The course is held once or twice each year, usually in February and June, numbers permitting.

Entry Requirements

The general entry requirement is an undergraduate degree or diploma, preferably in agriculture or the sciences.

A student who has a matric (Grade 12) and has passed the Junior Certificate Course with a Merit Pass (65% and above) will also be entitled to enroll.

A student who has a matric (Grade 12) certificate will be considered, depending on the outcome of an assessment and interview process.

The course and assessments are conducted in English and therefore requires that applicants be able to read, write and understand English.

Costs for 2024

South African sugar industry applicants:	R 18 186.00 + Vat (15%)	=	R 20 913.90
South African non-industry applicants:	R 20 914.00 + Vat (15%)	=	R 24 051.10
Applicants from outside South Africa:	R 24 698.00	=	R 24 698.00

This cost includes stationery (pen, pencil, ruler, eraser and calculator), course notes, SASRI Information Sheets, manuals, teas and excursion costs. Applicants should bring their own notebooks or writing pads. **This cost includes TUITION only – no meals are included.**

Application Information

Applications must be made on the official course application form (see page 4).

The closing date for applications is **30 November 2023**. Applicants will be accepted on a first come, first serve basis.

All applications and accompanying documents must be sent to:

The Course Administrator, South African Sugarcane Research Institute, Private Bag X02, Mount Edgecombe, 4300, South Africa.

E-mail: educane@sugar.org.za

Fax: +27 (0) 31 508 7597

Tel: +27 (0) 31 508 7400.

Successful applicants will be notified of their acceptance during **December 2023/January 2024**, and will be sent an acceptance letter and a pro-forma invoice. Upon receipt of these documents, full payment of course fees must be made. Students who have not paid in advance will not be admitted to the course.

No payments should be made until receipt of an acceptance letter and pro-forma invoice.
The closing date for payment is **12 January 2024**.

Banking Details

Payment to: South African Sugar Association (SASA)
Bank : STANDARD BANK, KINGSMEAD
Branch Code: 040026
Account Number: 050160079
Type of account : Current account

Accommodation Arrangements

Students are responsible for making their own arrangements for accommodation, meals and transport. SASRI does not offer accommodation but many students stay at the **Shukela Training Centre (STC)**.
Tel: +27 (31) 508 7700. Email: shukela.training@sasa.org.za

Foreign students must arrange their own transport from their point of arrival in South Africa to their place of accommodation. Neither SASRI nor the STC provides a shuttle service. SASRI does, however, provide a daily shuttle service between STC residences and the course venue.

There are canteen facilities at the course venue where light lunches, snacks and cold drinks are available.

Course Structure and Content

The duration of the course is five weeks and comprises both lectures and practicals. Each day commences at 08:00 and finishes at approximately 15:30. There are 10 minute intervals between lectures and a mid-morning tea break of 20 minutes. Tea and coffee is provided. The lunch break is from 13:00-13:40.

Modules and subjects covered during the course:

- 1. Soils**
 - Physical properties of soil
 - Soil water relationships
 - Soil biology
 - Organic matter
 - Soil chemistry, acidity and liming
 - Plant nutrition, nutrient application and management
 - Green manures
 - Salinity and sodicity
 - Soil quality assessment

- 2. Varieties**
 - History
 - Breeding
 - Botany: structure, propagation and physiology of cane plants
 - Agronomic characteristics
 - Identification of varieties
 - Choice of varieties

3. Diseases and Pests	Sugarcane diseases Seedcane production Insect pests Principles of pest control Nematodes and their control Biosecurity
